

## 50 Great Ideas for Sustainable Living

This book contains 50 practical ideas for ways that you can help to stem the tide of destruction that is overtaking the ecology of our one-and-only planet. It's a random selection from the 170 topics on our website. Each chapter is a topic from one of the following five categories: shelter - the way we house ourselves and provide electricity, warmth, water and other utilities to our homes; land - everything for gardens, allotments, smallholdings and small farms; lifestyle - how we live, shop, save, make our living, make and fix things, get around and look after our bodies; food & drink - getting, making, preparing, preserving and consuming it; nature - all about the stuff you can do in the great outdoors. Each topic is divided into three sections: what is it? - definition, history, background; benefits - environmental, health, money saving etc.; what can I do? - how you can take the next step. Why don't you get started and give them a try?
