

## Statistics for the Terrified, Third Edition

Statistics for the Terrified, 3/E, is a user-friendly introduction to elementary statistics, intended primarily for the reluctant, math anxious/avoidant person. Written in a personal and informal style, with healthy doses of humor and encouragement, the aim of the book is to help readers make the leap from apprehension to comprehension of elementary statistics. The book presents state-of-the-art, empirically supported self-help strategies (based on the cognitive behavioral techniques of rational emotive therapy) that help readers manage their math anxiety so they can relax and build confidence while still learning statistics. For those who need to learn statistics to further their career.
