**Plant Hormones: Describing the Big 5 - Untamed Science** Jan 20, 2015 Recent studies shed light on how these hormones interact with each other to promote and maintain plant growth and development. In this **Plant hormone receptors: new perceptions - Genes & Development** **The Yin-Yang of Hormones: Cytokinin and Auxin - Plant Cell** Plant growth and development require the integration of a variety of environmental and endogenous signals that, together with the intrinsic genetic program, **Plant Hormones: Chemical Control of Growth and Reproduction** Jul 15, 2014 Plant hormones have been extensively studied for their roles in the regulation of various aspects of plant development. However, in the last **Plant hormone receptors: new perceptions - NCBI - NIH** Feb 20, 2012 Often considered an aging hormone due to its role in accelerating such developmental processes as ripening, senescence, and abscission, **Regulation of plant growth and development** Plant hormones are structurally diverse compounds that act usually at nanomolar knowledge of how hormones affect plant growth and development and stress r. **Role of plant hormones and their interplay in development and** Hormonal Interactions in the Regulation of Plant Development. Annual Review of Cell and Developmental Biology. Vol. 28:463-487 (Volume publication date **Hormonal Regulation of Plant Growth and Development - NCBI - NIH** Growth and development of plants are regulated by signaling substances such as plant hormones. In plants, interactions between hormonal pathways represent **Hormonal interactions in the regulation of plant development.** Sep 14, 2004 This group includes auxin, cytokinin, the gibberellins (GAs), abscisic acid (ABA), ethylene, the brassinosteroids (BRs), and jasmonic acid (JA), each of which acts at low concentrations to regulate many aspects of plant growth and development. **Ethylene and the regulation of plant development BMC Biology** Dec 24, 2013 In contrast to animals, plants can continuously cease and resume growth. This flexibility in their architecture and growth patterns is partly **none** Int J Dev Biol. 200953(8-10):1597-608. doi: 10.1387/ijdb.072423da. Instructive roles for hormones in plant development.
