

## Journal of Botany, British and Foreign, 1863, Vol. 22 (Classic Reprint)

Excerpt from Journal of Botany, British and Foreign, 1863, Vol. 22. The following notes, collected during the past year, are in continuation of our paper in Journ. Bot. 1883, p. 20, and previous papers. The most important records are Chara Braunii, from Lancashire, not previously found in Britain; a new variety of C. fragilis, from Perth; C. vulgaris var. melanopyrena, from Cornwall; and Tolypella prolifera, from Lincoln. We have to thank our correspondents for the large number of specimens we have received, and especially Mr. Arthur Bennett for many specimens which he has transmitted to us from other botanists, besides those collected by himself. Much still remains to be done, in working out the comital distribution; from many counties we have only received one or two species, and from the following we are still without a single record: -Somerset S., Wilts N., Gloster E., Monmouth, Worcester, Glamorgan, Brecon, Carmarthen, Denbigh, Flint, Cheviotland, Man, Wigton, Ayr, Renfrew, Lanark, Selkirk, Linlithgow, Kincardine, Aberdeen N., Banff, Westerness, Dumbarton, Cantire, Ebudes M. S. & N., Ross E. & W., Hebrides, Cork S., Waterford, Tipperary N., Kilkenny, Carlow, Queens Co., Wexford, Kildare, Meath, Limerick, Clare, Kings Co., Longford, Roscommon, Mayo E., Monaghan, Armagh, and Tyrone. We shall be especially glad of specimens, or even the loan of specimens, from these counties. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
