

Numeracy Basics: Ages 6-7

This is an activity book designed to practice key numeracy skills with children aged 6-7. It is one of a series linked to the government's new Numeracy Strategy and gives advice on mental mathematics activities aimed to refresh skills learned at school as well as real-life mathematical problems. Notes to parents provide guidance on the activities, give suggestions for further projects and information on the curriculum in the forthcoming academic year to help prepare the child for school.
