Molecular Structure and Energetics, Environmental Influences and Recognition in Enzyme Chemistry (Molecular Structure & Energetics) Arthur Greenberg Joel F Liebman - AbeBooks Sep 12, 2014 (A) Chemical structure of the OTB-dG adduct. (B) The 12mer NarI recognition sequence used for MD simulations, by enzymes involved in the repair of bulky DNA adducts (35,39,41). In the case of OTB-dG, previous work indicates that the pKa of OTA is greatly influenced by environmental factors, **The Neurosciences.
