

Chemistry for Organised Schools of Science (Classic Reprint)

Excerpt from Chemistry for Organised Schools of Science

What should be included now within the scope of general education is a subject of much thought and discussion. On this matter there is much diversity of opinion even among practical educationists. The time is past for any scheme of education to be considered general, that advocates either a purely literary or a purely scientific training. The literary may render a student intimate with the great thoughts of the great minds of the world, and give him facility and power of expression; the scientific will give him patience in observation, neatness in manipulation, thoroughness in method, and the power to investigate. Both kinds of training are needed in a liberal education. As the inhabitants of earth this world must always be to men an object of interest, and our relations to it and its relation to us form subjects of even a more absorbing nature. The Science that reveals to us any of earths secrets, or hidden stores, that have but waited for the skilled hand and trained mind to discover, must therefore be accorded a place in any scheme of general education. Whether it be from the curiosity - so important a factor in the youthful acquisition of knowledge - excited by its processes, or the painstaking devotion of its disciples, or the keenly correct method of its investigations which nothing but the very truth will satisfy, or the marvellous results of its discoveries, Science has paramount claims for educational consideration. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the

original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
