

Discussions, Eight International Congress of Applied Chemistry, Vol. 27: Washington and New York, September 4 to 13, 1912 (Classic Reprint)

Excerpt from Discussions, Eight International Congress of Applied Chemistry, Vol. 27: Washington and New York, September 4 to 13, 1912 Discussion is said to be the *raison d'être* of congresses; and that is why men cross oceans and continents to attend them; the report of discussions may therefore be a proper measure of the value of the record of such gatherings. Therefore the officers of this Congress went to much additional labor and effort to make preparation for full discussion possible by printing in advance 560 papers (118 illustrated) in 24 volumes of a total of 4,950 pages and distributing all of them before the opening of the Congress to such members in attendance as cared to withdraw them; 1,322 members availed themselves of this opportunity. Ample stenographic service in the four official languages was provided at Columbia University for the use of members who desired to write their discussions out prior to delivery. For aid in reporting extemporaneous discussions months of effort were expended by Mr. Thomas A. Edison and his staff in originating a proper phonographic device, since ample competent stenographic service could be had under prohibitive terms only; each sectional meeting room was equipped with efficient apparatus and attendants and ample efficient transcribing facilities in the four official languages were provided; additional clerical help was kept accessible. This constituted the provisions, equipment and organization for the correct reporting of discussion. No such effort in a gathering of this kind can be successful without cooperation of the participants in discussion; the cooperation asked was that they should leave their visiting or similar cards with the sectional secretaries, should speak from the rostrum loudly and clearly, so that those in the rear of the room could understand and should be prompt in correcting the transcript of their remarks or

in providing a correct copy thereof to the sectional secretaries. The records show that 332 papers were discussed, that 860 persons took part therein and that 30% of the total meeting time was devoted to discussion. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
