

The Hand-Book Household Science a Popular Account of Heat, Light, Air, Aliment, and Cleansing, Ir/0 in Their Scientific Principles and Domestic ... Illustrative Diagrams (Classic Reprint)

The purpose has been, to condense within the limits of a convenient manual the largest possible amount of interesting and valuable scientific information of those agents, materials, and operations in which we have a concern, chiefly as dwellers in houses. The subjects are treated somewhat in an elementary way, but with constant reference to their domestic and practical relations. Principles are universal; their applications are special and peculiar. There are general laws of light, heat, and air, but they may be studied in various connections. There are many things about them which a person, as a resident of a house, cares little to know; wh Uethere are others In which he has a profound interest. To consider these, we assume to be the province of household science. The question of moisture in the air, for example, is one of universal scientific interest to meteorologists; but it has also a special antl vital import for the occuj)ants of stove and furnace heated rooms. Different colors, when brought together, alter and modify each other according to a simple and beautiful law and the Painter, the Decorator, and the Dyer, have each technical interest in the principle; but hardly more than ihi Lady at her toilette or engaged in furnishing her house. Thi Agriculturist is interested in the composition of food, as a producer; the Householder equally, as a consumer.(Typographical errors above are due to OCR software and dont occur in the book.)About the Publisher Forgotten Books is a publisher of historical writings, such as: Philosophy, Classics, Science, Religion, History, Folklore and Mythology.Forgotten Books Classic Reprint Series utilizes the latest technology to regenerate facsimiles of historically important writings. Careful attention has been made to accurately preserve the original format of each page whilst digitally enhancing the aged text.
